

Covid Guidelines for CEC Children Ministry (Revised on 05/02/22)

Children/Parents:

- 1) If your child is experiencing any of these symptoms within the past 48 hours (fever or chills; cough; shortness of breath or difficulty breathing; new loss of taste or smell; feeling fatigue; muscle or body ache; headache; sore throat; congestion or runny nose; nausea, or vomiting; diarrhea) please have them stay home. You should have your child tested for Covid and follow the recommendations of your pediatrician or Washington County Public Health guidance:
<https://www.co.washington.or.us/HHS/CommunicableDiseases/COVID-19/home-guidance.cfm>
- 2) Please make sure to check your child's temperature and condition before coming to church.
- 3) Masks will no longer be mandatory. We completely understand that everyone has a different comfort level with this new change and want to continue being sensitive and respectful towards one another. So, we would like to encourage everyone to do what feels most comfortable for you and your family at this time.
- 4) If your child has been considered to have been in "close contact" to someone with Covid, please have them quarantined for 5 days. We ask that you would get them tested if possible. If they get a negative result then can return after day 5. If they get a positive please follow up with their primary care provider and follow their recommendation or the recommendation on Washington County Public Health's website.
 - *"Close contact" is if they have been within 6 feet of someone who has Covid, or tested positive for Covid, for more than 15 minutes total in a 24 hour period. (Example: Being within 6 feet of someone for 10 minutes in the morning, 5 minutes in the afternoon and 5 minutes at night would be 20 minutes of close contact)*
- 5) If your child has been tested positive for Covid, we ask that he/she remain home and not return until cleared by their pediatrician.
- 6) Please contact the Children's Ministry Director (Jenny Kim) or Children's Ministry Deacon (Daisy Fan) when you find out that your child has been exposed to or has contracted Covid. This will help us to figure out the best course of action for our ministry, children, and their families.

- 7) When we become aware of a child who may have had Covid, while participating in any of our programming, we will notify parents of children who may have been exposed, so that they can follow up with their medical provider on the best course of action.
